

I claim:

1. (Cancelled)
2. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein the opening access door has ~~on it's~~ a lower surface to support the lowermost toilet paper roll of the stack and having a finger slot in which a user inserts ~~his/her~~ a finger to pull a toilet paper roll ~~out from the lower surface~~.
3. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein a pivoted lid is provided at on the upper end portion of the container to allow filling of the container.
4. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein the opening access door ~~in the front of the container~~ has a finger access slot into which a finger is inserted to allow the opening access door to be ~~opened~~; moved between the closed position and the open position ~~the opening being hinged on one side~~.
5. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein the container has a viewing aperture allowing a user to view how many toilet paper rolls are contained in the container.
6. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein mounting holes are provided on the rear of the container to allow the mounting of the ~~unit~~ container on a ~~suitable~~ surface.
7. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein reinforced mounting holes are provided on the rear of the container to allow secure mounting of the container to a surface.
8. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein the front of the container ~~is in the form of~~ comprises a slideable ~~[[,]]~~ removeable faceplate ~~and also comprises the opening for releasing toilet rolls~~.
9. (Cancelled)
10. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein toilet paper roll alignment bars are provided on the inside of the container to hold the toilet paper rolls therein in place.
11. (Currently amended) A toilet paper dispensing container as claimed in claim + 12 wherein the container ~~is~~ includes walls angled so that the container can be mounted in a corner ~~ereview~~ where two walls meet.
12. (New) A toilet paper roll dispenser comprising: a container having an upper portion and a lower portion for containing a stack of toilet paper rolls; an opening in the lower portion through which the lowermost toilet paper roll in the stack is extracted; an access door pivotally

connected to the container to move between a closed position to close the opening and an open position to expose the opening and extract the lowermost toilet paper roll of the stack; an extendable strap connected at one end to the access door; a track mechanism slidably connecting the other end of the extendable strap to the container such that when the access door is moved from the closed position to the open position the strap slides in the track mechanism to an extended position so as to be positioned to support the toilet paper roll above the lowermost toilet paper roll thereby holding the stack in place while the access door extracts the lowermost toilet paper roll and when the access door is moved from the open position to the closed position the extendable strap slides into the track mechanism to a retracted position so that the next toilet paper roll drops by gravity onto the base of the access door into position to be extracted by movement of the access door from the closed position to the open position.
